MSDS Prepared: June 15, 2005

SECTION 1 - SUBSTANCE IDENTITY

Product Name: Hepatitis B Immune Globulin (Human)
Synonyms: Nabi-HB[®]

SECTION 2 - CHEMICAL COMPOSITION AND DATA ON COMPONENTS

Components	OSHA PEL	ACGIH TLV	CAS Number
Human Immunoglobulin	N/A	N/A	N/A
Glycine	N/A	N/A	56-40-6
Sodium Chloride	N/A	N/A	7647-14-5
Polysorbate 80	N/A	N/A	9005-65-6
Sterile Water	N/A	N/A	7732-18-5

SECTION 3 - HAZARDS IDENTIFICATION

Hepatitis B Immune Globulin (Human), Nabi-HB[®], is a sterile solution of immunoglobulin containing antibodies to hepatitis B surface antigen (anti-HBs). Considered a biological product, Nabi-HB[®] is prepared from plasma donated by individuals with high titers of anti-HBs and is manufactured and distributed in accordance with the requirements of the United States Food and Drug Administration.

Biological products may contain infectious agents, such as viruses, that can cause disease. However, screening plasma donors for prior exposure to certain viruses and testing for the presence of certain viral infections has reduced the risk that this will occur. In addition, the manufacturing steps for Nabi-HB[®] are designed to reduce the risk of transmission of viral disease. Despite these measures, this biological product can still potentially transmit disease. There is also the possibility that unknown infectious agents may be present. As with any biological product, this product also has the potential for causing rare allergic or anaphylactic reactions.

This material contains no carcinogens or potential carcinogens (as identified by IARC, NTP or OSHA) at 0.1% or greater concentration. This product is a "mixture" of USP and NF chemicals and purified water for which no health hazard data exists. This mixture is not known to present a health hazard.

SECTION 4 - FIRST AID MEASURES

Ingestion:	Seek medical consultation immediately. Medical consultant should be familiar with OSHA Bloodborne Pathogen Standard (29 CFR 1910.1030) and the current U.S. Public Health Service/CDC guidelines.
Inhalation (i.e. aerosols):	Seek medical consultation immediately. Medical consultant should be familiar with OSHA Bloodborne Pathogen Standard (29 CFR 1910.1030) and the current U.S. Public Health Service/CDC guidelines.
Intact Skin Contact:	Wash area well with soap and water. In the unlikely event that irritation persists, seek medical care.
Mucous Membrane/Percutaneous: (i.e. splashes to eyes, nose, mouth and/or needlesticks, cuts to skin)	Flush area with water for 15 minutes. Seek medical consultation immediately. Medical consultant should be familiar with the OSHA Bloodborne Pathogens Standard (29 CFR 1910.1030) and the current U.S. Public Health Service/CDC guidelines.
Note to Physician:	N/A

SECTION 5 – FIRE AND EXPLOSION DATA

Fire:	Not considered to be a fire hazard.
Explosion:	Not considered to be an explosion hazard.
Fire Extinguishing Media:	Noncombustible. Use extinguishing media appropriate to surrounding fire conditions.
Special Fire Fighting Procedures:	Use protective clothing and breathing equipment appropriate for the surrounding fire.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Solutions of spilled materials can be taken up with absorbent material. Wear gloves and eye protection. Dispose of in accordance with local, state and federal regulations.

SECTION 7 - HANDLING AND STORAGE

Store in original container in cool dry area between 2 - 8°C. Protect from physical damage.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

Utilize gloves and eye protection. Do not mouth pipette. Care must be taken when handling material in hypodermic syringes.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

Solubility in Water:	Complete
Specific Gravity:	N/A
Freezing Point:	N/A
Boiling Point:	N/A
Vapor Pressure:	N/A
Melting Point:	N/A
Vapor Density:	N/A
Evaporation Rate:	N/A
Odor:	Odorless
pH:	5.8 - 6.5
Appearance:	Clear to opalescent liquid

SECTION 10 - STABILITY AND REACTIVITY

Stability:	Stable
Conditions to Avoid:	None known
Incompatibility (Materials to Avoid):	Strong oxidizing agents (sodium hypochlorite, hypochlorous acid, nitric acid)
Hazardous Decomposition Byproducts:	Glycine and Polysorbate 80 may decompose to carbon dioxide and carbon monoxide when heated to decomposition. Glycine may produce nitrogen oxides. When heated to above 804°C sodium chloride emits toxic vapors of chloride and sodium oxide.
Hazardous Polymerization:	None known

SECTION 11 - TOXICOLOGICAL INFORMATION

None

SECTION 12 - ECOLOGICAL INFORMATION

None

SECTION 13 - DISPOSAL CONSIDERATIONS

Dispose of in accordance with local, state and federal regulations.

SECTION 14 - TRANSPORT INFORMATION

According to DOT and IATA regulations this material is considered a biological product and should be shipped accordingly.

SECTION 15 – REGULATORY INFORMATION

The Food and Drug Administration has licensed this product.

SECTION 16 - OTHER INFORMATION

Nabi Biopharmaceuticals provides the information contained herein in good faith but makes no representation as to its comprehensiveness or accuracy. This document is intended only as a guide to the appropriate precautionary handling of the product by properly trained personnel. Individuals receiving this information must exercise their independent judgment in determining its appropriateness for a particular purpose. NABI BIOPHARMACEUTICALS MAKES NO REPRESENTATIONS OR WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE INFORMATION SET FORTH HEREIN. ACCORDINGLY, NABI BIOPHARMACEUTICALS WILL NOT BE RESPONSIBLE FOR DAMAGES RESULTING FROM USE OF OR RELIANCE UPON THIS INFORMATION.
